

JMeter Contents

- JMeter- Overview
- JMeter- Environment
- Build Test Plan
- What is a Test Plan?

-A Test Plan can be viewed as a container for running tests.

-It defines what to test and how to go about it.

-A complete test plan consists of one or more elements such as thread groups, logic controllers, sample-generating controllers, listeners, timers, assertions, and configuration elements.

-A test plan must have at least one thread group.

- Test Plan Elements.

Working with different Test Plans:

Web - Test Plan

DataBase - Test Plan

FTP - Test Plan

WebService - Test Plan

JMS - TestPlan

- Monitor Test Plan
- Listeners
- Functions
- Regular Expressions
- Best Practices
